PROJECTS

Spotify Clone

- Developed a fully functional music streaming application using HTML, CSS, and JavaScript, featuring real-time playback and interactive UI components.
- Implemented responsive design for seamless user experience across devices and core audio playback controls including play, pause, and track navigation.

Password Manager

- Designed a secure password management tool using React and Tailwind CSS to deliver a modern, intuitive interface.
- Integrated a MongoDB backend for encrypted storage and retrieval of user passwords, with a strong emphasis on data security and privacy.

URL Shortener

- Built a full-stack URL Shortener using Next.js, featuring custom short link generation, redirection, and expiry-based link management.
- Implemented secure user authentication with NextAuth and built an admin panel featuring click analytics and URL monitoring tools.

MERN - Food Ordering App (React, Node.js, Express.js, MongoDB, Auth0, Stripe)

- Developed and deployed a full-stack food ordering platform with user authentication, restaurant management, and dynamic order tracking.
 - Built secure, token-based RESTful APIs for users, restaurants, menus, and orders; integrated Auth0 for role-based access control and profile management.
 - Integrated Stripe for real-time checkout, payment processing, and webhook-based order status updates.
 - Designed a responsive UI with search, filters, cart management, and image uploads via Cloudinary; deployed on Render.
-

SKILLS

Languages : Java, Javascript

Framework & Libraries : React, Node.js, Next.js, Express.js, Auth0

Tools : Git (version control), GitHub (repository hosting)

Databases : MongoDB

APIs & Services: REST API, Stripe, Cloudinary
